## A. Communication with patients

## Core communication objectives:

Core communication objectives:	
	The student
1	Adapts own communication to the level of understanding and language of the patient, avoiding jargon.
2	Uses techniques to build up and maintain <b>rapport and an empathetic relationship</b> and ensures that <b>the patient feels attended and listened</b> to.
3	Relates to the patient <b>respectfully</b> including ensuring confidentiality, privacy and autonomy and recognizes the <b>patient as a partner</b> in shaping a relationship.
4	Elicits and explores the content of the patient's bio-psycho-social history
	(e.g. gathers relevant information, ensures understanding, relays information understandably, verbalises emotional content).
5	Encourages the patient to express own ideas, concerns, expectations and feelings and accepts legitimacy of patient's views and feelings.
6	<b>Gives information</b> to the patient (oral, written, electronic and over the phone) in a timely, comprehensive and meaningful manner.
7	Uses techniques of <b>active listening</b> (e.g. reflection, picking up patient's cues, paraphrasing, summarising, verbal and non-verbal techniques).
8	Recognises <b>difficult situations and communication challenges</b> (e.g. crying, strong emotional feelings, interruptions, aggression, anger, anxiety, embarrassing or sensitive issues, cognitive impairment, delivering bad news) and <b>deals with them sensitively and constructively.</b>
9	Shows <b>awareness of the non-verbal communication of both</b> the patient and the healthcare professional (e.g. eye contact, gestures, facial expressions, posture) and responds to them appropriately.
10	Shapes a conversation from beginning to end with regard to structure (e.g. introduction, initiating the
	conversation, gathering and giving information, planning, closing interview, setting up next meeting; time management).
11	Uses different <b>types of questions</b> (e.g. open, closed and focused) according to the situation.
More	e detailed specific objectives, depending on context and situation:
	<b>ing of relationship:</b> The student involves the patient in the interaction to establish a therapeutic relationship a patient-centred approach
12	Identifies patient expectations with respect to the role of health care professional.
13	Uses adequate strategies to solve conflicts (e.g. feedback on perception, impact, wishes).
	ent's perspective and health beliefs: The student orients own communication in line with the actual needs concerns of the patient
14	Elicits the <b>needs and capabilities of the patient</b> (e.g information, autonomy, truth and responsibility) and <b>adapts the plan / intervention</b> to patient's resources and strengths.
15	Considers <b>somatic, mental, social, gender, cultural, ethical and spiritual</b> elements in the care and assessment of the patient and perceives divergences between own values and norms and the patient's.
16	Responds to the <b>patient's health beliefs and theories of illness</b> and contrasts and integrates these into own theories of illness as a health care professional.
<b>Infor</b> maki	mation: The student effectively collects and communicates relevant information for reasoning and decision- ng
17	Finds out how much information the patient requires and gives the appropriate amount of information.
18	Provides <b>information in a patient-centered way</b> and shares it with the patient's consent (e.g. colleagues, family and others.)
19	Elicits and synthesises information for patient care.
20	Inquires about the patient's level of knowledge about the illness
21	Considers <b>different elements of a patient history</b> (history of the illness, history of the health care professional-patient relationship, history of the patient).
22	Knows about the importance of supplementing verbal information with diagrams, models, written

23	
20	Seeks out and synthesises relevant information <b>from other sources</b> (e.g. patient's family, caregivers and other professionals), if necessary and available
	oning and decision-making: The student considers the extent to which individuals are involved and onsible in the reasoning and decision-making process
24	Ascertains how much involvement and responsibility the patient is willing and able to take for decision- making.
25	Discusses with the patient the likely advantages, disadvantages and expected outcomes
26	Encourages <b>active participation by</b> the patient <b>in decision-making</b> and <b>explains choices or rights</b> to the patient in a patient-centered manner.
27	Clarifies own role in decision-making process.
28	Discusses with patient the spectrum of possible <b>consequences of a decision</b> and explains to the patient the likely <b>consequences of not choosing diagnostic and therapeutic measures</b> .
29	Inquires about the <b>relevant psychological and social resources</b> the patient has available for making a decision.
30	Offers the patient the option to <b>include other people in the decision- making process</b> and clarifies with the patient how and when a decision must be made.
31	<b>Discusses decisions</b> with colleagues, patients and their relatives as appropriate and regularly <b>reassesses own decisions</b> and revises them if necessary.
32	Identifies own opinion clearly to the patient if asked.
Unce	rtainty: The student respects uncertainty as an integral part of reasoning and decision-making
33	Talks openly to the patient about uncertainty and formulates ways of dealing with it.
34	Explains to the patient which <b>information is needed to minimize uncertainty</b> in the decision-making process.
E	3. Intra- and interpersonal communication (Professionalism and Reflection)
<b>Communication and reflection with self and others</b> : The student consistently develops and improves self-awareness, self-reflection, self-care and reflects with others on own communication and behaviour	
1	<b>Recognises own emotions</b> (e.g. insecurity, sympathy/antipathy, attraction) in relation to others (e.g. patients, colleagues) and is able to <b>work efficiently despite own emotional reactions</b> when the situation
2	requires to do so (e.g. degree of suffering of the patient, demanding patient).
	requires to do so (e.g. degree of suffering of the patient, demanding patient). Recognizes that effective communication with patients can <b>foster patients</b> ' <b>satisfaction and improved clinical outcomes</b> .
3	Recognizes that effective communication with patients can foster patients' satisfaction and improved
3 4	Recognizes that effective communication with patients can <b>foster patients</b> ' <b>satisfaction and improved clinical outcomes</b> .
	<ul> <li>Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.</li> <li>Describes and assesses own communication and behaviour critically considering alternatives in both.</li> <li>Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own</li> </ul>
4	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes. Describes and assesses own communication and behaviour critically considering alternatives in both. Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values. Assesses own stereotypes and social prejudices and is aware that own actions are influenced by
4 5	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.         Describes and assesses own communication and behaviour critically considering alternatives in both.         Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values.         Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests.         Reflects on own attitude towards work (e.g. cynicism, satisfaction).         Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care professional (e.g. patient unable to give consent, health/illness concepts in different cultures, translators)
4 5 6	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.         Describes and assesses own communication and behaviour critically considering alternatives in both.         Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values.         Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests.         Reflects on own attitude towards work (e.g. cynicism, satisfaction).         Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care
4 5 6 7	Recognizes that effective communication with patients can <b>foster patients</b> ' <b>satisfaction and improved</b> clinical outcomes. Describes and assesses own communication and behaviour critically considering alternatives in both. Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values. Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests. Reflects on own attitude towards work (e.g. cynicism, satisfaction). Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care professional (e.g. patient unable to give consent, health/illness concepts in different cultures, translators) and discusses approaches for resolution.
4 5 6 7 8	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.         Describes and assesses own communication and behaviour critically considering alternatives in both.         Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values.         Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests.         Reflects on own attitude towards work (e.g. cynicism, satisfaction).         Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care professional (e.g. patient unable to give consent, health/illness concepts in different cultures, translators) and discusses approaches for resolution.         Uses authority and influence responsibly.         Analyses and discusses conversational situations with others (metacommunication in e.g. peer
4 5 6 7 8 9 10 <b>Deali</b>	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.         Describes and assesses own communication and behaviour critically considering alternatives in both.         Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values.         Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests.         Reflects on own attitude towards work (e.g. cynicism, satisfaction).         Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care professional (e.g. patient unable to give consent, health/illness concepts in different cultures, translators) and discusses approaches for resolution.         Uses authority and influence responsibly.         Analyses and discusses conversational situations with others (metacommunication in e.g. peer reflexion, team conferences, Balint groups).         Knows about models of the health care professional–patient relationship (e.g. transference/counter
4 5 6 7 8 9 10 <b>Deali</b>	Recognizes that effective communication with patients can foster patients' satisfaction and improved clinical outcomes.         Describes and assesses own communication and behaviour critically considering alternatives in both.         Identifies, reflects and communicates own strengths, weaknesses, limitations and assesses own wishes, fears, goals, norms and values.         Assesses own stereotypes and social prejudices and is aware that own actions are influenced by personal experience, the current situation, own knowledge and interests.         Reflects on own attitude towards work (e.g. cynicism, satisfaction).         Reflects and discusses ethical, inter-cultural and other challenges in own actions as a health care professional (e.g. patient unable to give consent, health/illness concepts in different cultures, translators) and discusses approaches for resolution.         Uses authority and influence responsibly.         Analyses and discusses conversational situations with others (metacommunication in e.g. peer reflexion, team conferences, Balint groups).         Knows about models of the health care professional–patient relationship (e.g. transference/counter transference, reciprocity, inter-subjectivity, expectation/experience, potential imbalance of hierarchy).         ng with errors and uncertainty: The student addresses errors and respects uncertainty as an integral part

## C. Communication in health care teams (Professional communication)

	<b>Teamwork and professional communication:</b> The student shows ability to communicate effectively in multi- professional teams	
1	Perceives and <b>respects individuality, subjective perception, different points of view</b> of team members and the <b>expertise</b> of the different health care professionals.	
2	Contributes to a <b>positive working atmosphere</b> (e.g. supports and integrates team members, mentions the positive side of unpleasant aspects, values team-success).	
3	Uses feedback rules (e.g. first-person-statements) and gives feedback to team-members appropriately.	
4	Is able to solve conflicts and enables a constructive negotiation in a healthcare team.	
5	Takes on, clarifies and reflects on <b>own role and responsibilities in the team</b> (e.g. team vs. team-player, leader) and identifies the <b>role of own profession</b> in an inter-professional team.	
6	Specifies and <b>appreciates own potential</b> with regard to the team and is <b>willing and able to work</b> with others.	
7	Understands the <b>principles of team dynamics</b> and how factors both support and inhibit teamwork in practice.	
8	Identifies own interests and distinguishes these from the team goals.	
9	Reflects on the impact of own opinion on others and takes this into account.	
Leadership: The student shows basic competencies in leadership skills		
10	Gives clear instructions.	
11	Ensures that all relevant information is available.	
12	Facilitates the formation of opinions in the group and encourages and rewards team members to <b>voice differing opinions</b> .	
<b>Professional communication and management:</b> The student uses effective and efficient communication and management strategies		
13	Maintains clear, appropriate records (written or electronic) of clinical encounters and plans.	
14	<b>Presents</b> expert knowledge <b>effectively</b> (e.g. presenting a patient and clinical details to others, speaking in front of a group, presenting scientific data).	
15	Identifies and is knowledgeable of <b>how to refer</b> to people/ institutions/ agencies that can help to solve problems appropriate to the situation.
