matriculation number: _____

Grading for medical elective students

The grading is based on a point system in which a maximum score of 100 can be achieved. There is a basic area in which the requirements **must** be fulfilled (conversation and presence) and another area in which the participant **can** fulfill the requirements. The corresponding grading results as follows:

Basics:

- ☐ Conversation with a patient conducted in front of the group & presence fulfilled (not more than 2 days of absence)
= 60 points

Reflection

- ☐ Reflection report submitted (contains 600 words - a deviation of +/- 10% is tolerated)
= 0 - 2,5 points
- ☐ Formal criteria are adequately fulfilled (spelling, expression, form, ...)
= 0 - 2,5 points
- ☐ Reflection report contains a clear discussion of the topic (about one's own patient interview and/or about oneself in regard to the group and/or about personal development)
= 0 - 15 points

Participation:

- ☐ The participant has regularly participated actively
= 0 - 5 points
- ☐ The contributions were constructive for the interview/ the discussion/ the dynamics of the group (e.g.: initiates new discussion topics, observes and articulates the group events, shows development, gives constructive feedback)
= 0 - 15 points

The points are added up to form a percentage:

90 - 100 = very good
80 - 89,5 = good
70 - 79,5 = satisfactory
60 - 69,5 = sufficient
< 60 = insufficient (failed)
