Attachment 2: Concept and performance record of the elective "Climate-sensitive health counselling" Giessen; winter term 2021/22 [translated from the original German version]

Elective *"Climate-sensitive Health Counselling"*:
The intersection of climate change and health
In the winter semester 2021/22 at Justus Liebig University Giessen

Procedure:
Mondays from 6:15-7:45 p.m., weekly **beginning Nov. 1, 2021** plus one **concluding session on Jan. 29, 2022** (9 a.m.-3 p.m.)

Content:
The climate crisis threatens our health. This connection is undisputed in science. You haven't heard about this yet, even though you are studying medicine? As future physicians, we are aware of our position as important mediating and mitigating actors regarding the climate crisis and would like to educate ourselves in this regard.

The aim of the elective is to provide students with competencies on both the content and the communicative-creative level on the topic of climate change and health. The focus should be particularly on health prevention and science communication of the topic.

In terms of content, we will address the following in the elective:

⟹ Fundamentals of climate change

⟹ Nutrition

⟹ Heat, air pollution

⟹ Lung Health

⟹ Gynecology

⟹ Infectiology

⟹ Mental health

⟹ Public Health

⟹ The role of the health sector

⟹ Climate communication/behavior change

Proof of Performance:
Portfolio for one elective session

Registration:
