## **Attachment 2: Questionnaire**

c1   The teacher spoke in a dull voice.     c2   The teacher avoided eye contact with the students.     c3   The teacher had a blunt face.     c4   The teacher integrated gestures congruent to his words.     c5   The teacher integrated gestures congruent to his words.     c6   The teacher remunicated in a humorous fashion.     c7   The teacher responded adequately to the students.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher responded adequately to the students' questions and suggestions.     c10   The teacher responded adequately to the students' questions and suggestions.     c11   The teacher responded adequately to the students' questions and suggestions.     c21   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in		
c3   The teacher had a blunt face.     c4   The teacher integrated gestures congruent to his words.     c5   The teacher had a lively way of speaking.     c6   The teacher communicated in a humorous fashion.     c7   The teacher responded adequately to the students.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher responded adequately to the students' questions and suggestions.     c10   The teacher showed interest in my learning progress.     c11   The teacher showed interest in my learning progress.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The image materials used helped me a lot to work out the material.     q8   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.	c1	The teacher spoke in a dull voice.
c4   The teacher integrated gestures congruent to his words.     c5   The teacher had a lively way of speaking.     c6   The teacher communicated in a humorous fashion.     c7   The teacher was open to the concerns of the students.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher ensured a positive working climate.     c10   The teacher is an expert in his field.     c112   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The iaration of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q9   I contributed orally to the seminars.     q10   Digital media/images are integrated into the seminars sensibly.     q1	c2	The teacher avoided eye contact with the students.
c5   The teacher had a lively way of speaking.     c6   The teacher communicated in a humorous fashion.     c7   The teacher responded adequately to the students' questions and suggestions.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher responded adequately to the students' questions and suggestions.     c10   The teacher ensured a positive working climate.     c10   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q7   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q9   I contributed orally to the seminars.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My knowledge is considerably greater after the seminars.     q12   I have learned something useful and important for medical practice.	c3	The teacher had a blunt face.
c6   The teacher communicated in a humorous fashion.     c7   The teacher was open to the concerns of the students.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher ensured a positive working climate.     c10   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q9   I contributed orally to the seminars.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My knowledge is considerably greater after the seminars sensibly.     q12   I have learned something useful and important for medical practice.	c4	The teacher integrated gestures congruent to his words.
c7   The teacher was open to the concerns of the students.     c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher ensured a positive working climate.     c10   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The image materials used helped me a lot to work out the material.     q8   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q9   I contributed orally to the seminars.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My knowledge is considerably greater after the seminars.     q12   I have learned something useful and important for medical practice.	c5	The teacher had a lively way of speaking.
c8   The teacher responded adequately to the students' questions and suggestions.     c9   The teacher ensured a positive working climate.     c10   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The image materials used helped me a lot to work out the material.     q8   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q9   I contributed orally to the seminars.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My understanding of radiology has developed through the seminars.     q13   My understanding of radiology has developed through the seminars.     q14   I am technically interesetd. <t< td=""><td>c6</td><td>The teacher communicated in a humorous fashion.</td></t<>	c6	The teacher communicated in a humorous fashion.
c9   The teacher ensured a positive working climate.     c10   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The image materials used helped me a lot to work out the material.     q8   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My knowledge is considerably greater after the seminars.     q12   I have learned something useful and important for medical practice.     q13   My understanding of radiology has developed through the seminars.     q14   My desire has grown to choose an imaging subject for my later continuing education.     q11   I am good at using s	c7	The teacher was open to the concerns of the students.
c10   The teacher showed interest in my learning progress.     c11   The teacher is an expert in his field.     c12   I could imagine the teacher as a mentor.     q1   The seminars are well organized.     q2   The seminars follow a clear structure.     q3   The learning objectives are clearly defined and comprehensible.     q4   In the seminars, there is an open climate for personal contributions.     q5   Following and thinking through the material/topic is encouraged.     q6   A connection between the basics of imaging and its use in clinical questions is established.     q7   The image materials used helped me a lot to work out the material.     q8   The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.     q10   Digital media/images are integrated into the seminars sensibly.     q11   My knowledge is considerably greater after the seminars than before.     q12   I have learned something useful and important for medical practice.     q13   My understanding of radiology has developed through the seminars.     q14   My desire has grown to choose an imaging subject for my later continuing education.     q11   I am technically interested.     q22   I am good at using smartph	c8	The teacher responded adequately to the students' questions and suggestions.
c11The teacher is an expert in his field.c12I could imagine the teacher as a mentor.q1The seminars are well organized.q2The seminars follow a clear structure.q3The learning objectives are clearly defined and comprehensible.q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.q1I am good at using smartphones.q3Social networks play an important role for me.	c9	The teacher ensured a positive working climate.
c12I could imagine the teacher as a mentor.q1The seminars are well organized.q2The seminars follow a clear structure.q3The learning objectives are clearly defined and comprehensible.q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14I am technically interested.q2I am good at using smartphones.q3Gocial networks play an important role for me.	c10	The teacher showed interest in my learning progress.
q1The seminars are well organized.q2The seminars follow a clear structure.q3The learning objectives are clearly defined and comprehensible.q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	c11	The teacher is an expert in his field.
q2The seminars follow a clear structure.q3The learning objectives are clearly defined and comprehensible.q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	c12	I could imagine the teacher as a mentor.
q3The learning objectives are clearly defined and comprehensible.q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q1	The seminars are well organized.
q4In the seminars, there is an open climate for personal contributions.q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q2	The seminars follow a clear structure.
q5Following and thinking through the material/topic is encouraged.q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q3	The learning objectives are clearly defined and comprehensible.
q6A connection between the basics of imaging and its use in clinical questions is established.q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q4	In the seminars, there is an open climate for personal contributions.
q7The image materials used helped me a lot to work out the material.q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q5	Following and thinking through the material/topic is encouraged.
q8The variation of the learning activities (e.g. image analysis, interaction with fellow students, discussion etc.) is optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q6	A connection between the basics of imaging and its use in clinical questions is established.
optimal for me.q9I contributed orally to the seminars.q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q7	The image materials used helped me a lot to work out the material.
q10Digital media/images are integrated into the seminars sensibly.q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q8	
q11My knowledge is considerably greater after the seminars than before.q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q9	I contributed orally to the seminars.
q12I have learned something useful and important for medical practice.q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q10	Digital media/images are integrated into the seminars sensibly.
q13My understanding of radiology has developed through the seminars.q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q11	My knowledge is considerably greater after the seminars than before.
q14My desire has grown to choose an imaging subject for my later continuing education.d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q12	I have learned something useful and important for medical practice.
d1I am technically interested.d2I am good at using smartphones.d3Social networks play an important role for me.	q13	My understanding of radiology has developed through the seminars.
d2 I am good at using smartphones.   d3 Social networks play an important role for me.	q14	My desire has grown to choose an imaging subject for my later continuing education.
d3 Social networks play an important role for me.	d1	I am technically interested.
	d2	I am good at using smartphones.
d4 I enjoy reading in digital format.	d3	Social networks play an important role for me.
	d4	I enjoy reading in digital format.
